*Battling the Gods* Tim Whitmarsh, 2015-11-10 How new is atheism Although adherents and opponents alike today present it as an invention of the European Enlightenment when the forces of science and secularism broadly challenged those of faith disbelief in the gods in fact originated in a far more remote past In *Battling the Gods* Tim Whitmarsh journeys into the ancient Mediterranean a world almost unimaginably different from our own to recover the stories and voices of those who first refused the divinities Homer's epic poems of human striving journeying and passion were ancient Greece's only sacred texts but no ancient Greek thought twice about questioning or mocking his stories of the gods Priests were functionaries rather than sources of moral or cosmological wisdom The absence of centralized religious authority made for an extraordinary variety of perspectives on sacred matters from the devotional to the atheos or godless Whitmarsh explores this kaleidoscopic range of ideas about the gods focusing on the colorful individuals who challenged their existence Among these

were some of the greatest ancient poets and philosophers and writers as well as the less well known Diagoras of Melos perhaps the first self professed atheist Democritus the first materialist Socrates executed for rejecting the gods of the Athenian state Epicurus and his followers who thought gods could not intervene in human affairs the brilliantly mischievous satirist Lucian of Samosata Before the revolutions of late antiquity which saw the scriptural religions of Christianity and Islam enforced by imperial might there were few constraints on belief Everything changed however in the millennium between the appearance of the Homeric poems and Christianity's establishment as Rome's state religion in the fourth century AD As successive Greco Roman empires grew in size and complexity and power was increasingly concentrated in central capitals states sought to impose collective religious adherence first to cults devoted to individual rulers and ultimately to monotheism In this new world there was no room for outright disbelief the label atheist was used now to demonize anyone who merely disagreed with the orthodoxy and so it would remain for centuries As the twenty first century shapes up into a time of mass information but also paradoxically of collective amnesia concerning the tangled histories of religions Whitmarsh provides a bracing antidote to our assumptions about the roots of freethinking By shining a light on atheism's first thousand years *Battling the Gods* offers a timely reminder that nonbelief has a wealth of tradition of its own and indeed its own heroes

**Shaping a Digital World** Derek C. Schuurman, 2013-05-02 Building on the work of Jacques Ellul Marshall McLuhan and Neil Postman as well as a wide range of Reformed thinkers Derek Schuurman provides a brief theology of technology rooted in the Reformed tradition and oriented around the grand themes of creation fall redemption and new creation

[Geography and Geographers](#) Ronald John Johnston, 1979 *Tradition Through Modernity* Pertti J. Anttonen, 2005 When studying social practices that are regarded as traditional tradition is usually seen as an element of meaning Whose meaning is it Is it a meaning generated by those who study tradition or those who are being studied In both cases particular criteria for traditionality are employed whether these are explicated or not The individuals

groups of people and institutions that are studied may continue to uphold their traditions or name their practices traditions without having to state in analytical terms their criteria for traditionality This cannot however apply to people who make the study of traditions their profession especially those engaged in the academic field of the science of tradition a paraphrase given to folklore studies Traditions call for explanation instead of being merely described or used as explanations for apparent repetitions reiterations replications continuations or symbolic linking in social practice values meaning culture and history In order to explain the concept of tradition and the category of the traditional scholars must situate its use in particular historically specific discourses ways of knowing speaking conceptualisation and representation in which social acts receive their meanings as traditional This book argues that since the concepts of tradition and modern are fundamentally modern what they aim to and are able to describe report and denote is epistemologically modern as that which is regarded as non modern and traditional is appropriated into modern social knowledge through modern concepts and discursive means Modernity cannot represent non modernity without modern mediation which therefore makes the representations of non modernity also modern Accordingly the book deals with the modernness of objectifying representing and studying folklore and oral traditions The first section focuses on modern and tradition as modern concepts and the conception of folklore and its study as a modern trajectory The second section discusses the politics of folklore with regard to nationalism and the role of folk tradition in the production of nation state identity in Finland

**Humanistic Psychotherapies** David J. Cain, Kevin Keenan, Shawn Rubin, 2016 This thoroughly revised update to the first edition highlights cutting edge research on the effectiveness of various humanistic psychotherapy approaches Illustrative case examples containing vivid client therapist dialogue demonstrate how to apply humanistic principles in practice Humanistic psychotherapy is based on more than 70 years of psychological research but there has been a surge of literature since the first edition of Humanistic Psychotherapies

This extensively updated volume highlights the flourishing evidence base for humanistic approaches demonstrating that they are equal to or more effective than other therapeutic approaches. In fact, cornerstones of humanistic practice such as therapist empathy and authentic emotional expression and experience are essential to promoting positive client outcomes for non-humanistic practitioners as well. In addition to a general review of research, the contributors focus on specific approaches including person-centered therapy, gestalt therapy, focusing-oriented therapy, existential therapy, emotion-focused therapy, relationship enhancement therapy, and child-centered play therapy. Also discussed are important therapist factors and client variables that contribute to effective psychotherapy. New findings are translated into practical guidelines for clinicians. Numerous case examples with vivid client-therapist dialogues illustrate how humanistic principles and approaches can be applied in actual practice, not just with individuals but also with couples, families, and children. The final chapter synthesizes the entire volume with a proposed model for optimal humanistic psychotherapeutic practice based on 20 simple premises drawn from the best evidence available. *An Introduction to the History of Psychology* B.
