The Hydrogen Murder A Gloria Lamerino Mystery:

The Helium Murder Camille Minichino, 2004 In Massachusetts physicist and forensic expert Gloria Lamerino probes the hit and run death of a congresswoman about to cast a critical vote affecting government helium reserves **The Lithium Murder** Camille Minichino, 1999-04-21 A new mystery in this unique series based on the 109 elements of the periodic table plunges plucky physicist Gloria Lamerino into an explosive mixture of hard science and sudden death Synthesize Angela Lansbury's Jessica Fletcher with pure essence of Sue Grafton Add a pinch of Patricia Cornwell as catalyst Stir vigorously then stand back because once this formula starts to fizz it's definitely volatile Someone could get killed In fact someone does an elderly janitor at a government funded lab in Revere Massachusetts and when the homicide cops investigate their first reaction is that they need the expert assistance of someone who knows her way around the table of elements That would be Gloria Lamerino retired physicist turned scientific consultant to Revere's police department and the feisty adventurous intelligent heroine of Minichino's provocative and original series of mysteries It isn't long before Gloria develops a hypothesis The lab's hush hush lithium experiments aren't the only secrets she'll uncover before her research project is done if she lives so long After all one man's dead already and lithium can be very deadly Featuring an engaging not so young heroine with both brains and hips her lovable boyfriend Matt Gennaro and a quirky believable cast of Italian American characters this thoroughly gripping thriller is clever and precisely plotted enough to rival Agatha Christie if she'd only had a Ph.D. in physics and a Yankee twang The Oxygen Murder Camille Minichino, 2025-06-25 New York City welcomes Gloria Lamerino and her husband homicide detective Matt Gennaro in *The Oxygen Murder* the eighth installment in Camille Minichino's acclaimed Periodic Table Mystery series Gloria and her best friends Rose and Frank Galigani are on vacation in the Big Apple They plan to visit Matt's niece Lori Pizzano a documentary filmmaker and enjoy the holiday sights together shopping on Fifth Avenue dining in Little Italy and honoring ancestors at Ellis Island while Matt attends a conference with the NYPD Unfortunately Lori's documentary on ozone and environmental issues has deadly fallout Gloria stumbles over the body of Lori's scheming camerawoman in a Times Square loft and once again she is thrust into some dangerous sleuthing With suspects ranging from a disapproving brother to a smooth talking PR administrator to a self protecting private eye Gloria tracks a killer through an intricate landscape of colorful neighborhoods and famous landmarks Taking us on a trip from the city's tallest building to its grand park from its crowded ice rinks to a lonely corner of its two million square foot museum *The Oxygen Murder* is as exciting as a ride over New York City in a helium balloon *Mystery Women, Volume Three (Revised)* Colleen Barnett, 2010-12-31 Like other fictional characters female sleuths may live in the past or the future They may represent current times with some level of reality or shape their settings to suit an agenda There are audiences for both realism and escapism in the mystery novel It is interesting however to compare the fictional world of the mystery sleuth with the world in which readers live Of course mystery readers do not share one simplistic world They live in urban suburban and

rural areas as do the female heroines in the books they read They may choose a book because it has a familiar background or because it takes them to places they long to visit Readers may be rich or poor young or old conservative or liberal So are the heroines What incredible choices there are today in mystery series This three volume encyclopedia of women characters in the mystery novel is like a gigantic menu Like a menu the descriptions of the items that are provided are subjective Volume 3 of *Mystery Women* as currently updated adds an additional 42 sleuths to the 500 plus who were covered in the initial Volume 3 These are more recently discovered sleuths who were introduced during the period from January 1 1990 to December 31 1999 This more than doubles the number of sleuths introduced in the 1980s 298 of whom were covered in Volume 2 and easily exceeded the 347 series and some outstanding individuals described in Volume 1 which covered a 130 year period from 1860 1979 It also includes updates on those individuals covered in the first edition changes in status short reviews of books published since the first edition through December 31 2008
