Gold,2013-11-11 It has been over 50 years since Hans Selye formulated his concept of stress This came after the isolation of epinephrine and norepinephrine and after the sympathetic system was associated with Walter Cannon s fight or flight response The intervening years have witnessed a number of discoveries that have furthered our understanding of the mechanisms of the stress response The isolation identification and manufacture of glucocorticoids the identification and synthesis of ACTH and vasopressin and the demonstration of hypothalamic regulation of ACTH secretion were pivotal discoveries The recent identification and synthesis of CRH by Willie Vale and his colleagues gave new impetus to stress research Several new concepts of stress have developed as a result of advances in bench research These include the concept of an integrated stress system the realization that there are bidirectional effects between stress and the immune system the suggestion that a number of common psychiatric disorders represent dysregulation of systems responding to stress and the epidemiologic association of stress with the major scourges of humanity Library Journal ,1999 Our Common Future World Commission on Environment and Development,1987 Thinking in Systems Donella H. Meadows,2009 Thinking in Systems is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global This essential primer brings systems thinking out of the realm of computers and equations and into the tangible world showing readers how to develop the systems thinking skills that thought leaders across the globe consider critical for 21st century life While readers will learn the conceptual tools and methods of systems thinking the heart of the book is grander than methodology Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas She reminds readers to pay attention to what is important not just what is quantifiable to stay humble and to continue to learn In a world growing ever more complicated crowded and interdependent Thinking in Systems helps readers avoid confusion and helplessness the first step toward finding proactive and effective solutions A vital read for students professionals and all those concerned with economics business sustainability and the environment

Edible Insects Arnold van Huis,Food and Agriculture Organization of the United Nations,2013 Edible insects have always been a part of human diets but in some societies there remains a degree of disdain and disgust for their consumption Although the majority of consumed insects are gathered in forest habitats mass rearing systems are being developed in many countries Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production diversify diets and support livelihoods in both developing and developed countries It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed It examines the body of research on

issues such as insect nutrition and food safety the use of insects as animal feed and the processing and preservation of insects and their products It highlights the need to develop a regulatory framework to govern the use of insects for food security And it presents case studies and examples from around the world Edible insects are a promising alternative to the conventional production of meat either for direct human consumption or for indirect use as feedstock To fully realise this potential much work needs to be done by a wide range of stakeholders This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life and it will stimulate debate on the expansion of the use of insects as food and feed
