other subject disciplines **Communications in Interference Limited Networks** Wolfgang Utschick,2016-02-04 This book offers means to handle interference as a central problem of operating wireless networks It investigates centralized and decentralized methods to avoid and handle interference as well as approaches that resolve interference constructively The latter type of approach tries to solve the joint detection and estimation problem of several data streams that share a common medium In fact an exciting insight into the operation of networks is that it may be beneficial in terms of an overall throughput to actively create and manage interference Thus when handled properly mixing of data in networks becomes a useful tool of operation rather than the nuisance as which it has been treated traditionally With the development of mobile robust ubiquitous reliable and instantaneous communication being a driving and enabling factor of an information centric economy the understanding mitigation and exploitation of interference in networks must be seen as a centrally important task **Historical Development of the Graphical Representation of Statistical Data** Howard Gray Funkhouser,1937

History and Imperialism Louis Althusser,2020-02-18 Writings on History brings together a selection of texts by Louis Althusser dating from 1963 to 1986 including essays a lecture notes to his collaborators and the transcript of an informal 1963 discussion of literary history The centrepiece of this collection is Althusser s previously unpublished *Book on Imperialism* a theorization of globalized capitalism that remained unfinished All these writings are concerned with the place of history in Marxist theory and in particular on what Althusser considered to be the mortal danger of historicism haunting the revolutionary reading of the present They testify to his continuing dialogue with the

historiography of his day several of whose representatives were engaged in discussion and debate with him Deeply interested in history but intent on avoiding the kind of interpretation that would transform it into a deterministic force Althusser never ceased to reflect on the equilibrium between the historical and the concept in Marxist historiography an equilibrium that he sought to reinvent for his time The traces of that undertaking which continues to generate debate throughout the world today are brought together in this volume Bulletin of the American Mathematical Society American Mathematical Society,1915 **Education in Foreign Countries, 1913-1914** Anna Tolman Smith,1915 **History Theses 1981-90**,1994 **Angels of Efficiency** Florian Hoof,2020-03-02 Angels of Efficiency traces the invention of film and the parallel rise of management consulting telling the story of how these together brought about new forms of information visualization and visual management The period from 1880 to 1930 author Florian Hoof argues saw the genesis of a form of visual knowledge that provided a novel means to intervene in management processes Visual management largely superseded oral and written forms of communication and decision making instituting a strategy for overcoming the mid nineteenth century crisis of control and resulting in a media based form of rationality Focusing largely on early corporate consulting in America by tracing the careers of Frank Gilbreth and his wife and business partner Lillian Gilbreth Hoof examines the rise and lasting effects of corporate consulting as a visual form Framing consulting as a cultural technique that is characterized by media processes in which the boundaries of economic logic and legitimacy emerge Angels of Efficiency forges a new approach to the history of consulting In addition to pioneering a new field of film and media studies Hoof contributes original research to American cultural and economic history such as archival findings concerning Gilbreth s consulting efforts for the German Army during WWI With this distinct and innovative interdisciplinary approach Hoof has marshalled cinema and media studies business history and science and technology studies to make sense of the rise of consulting practices and their remarkable stability to this day Bulletin (new Series) of the American Mathematical Society ,1915 *The Material Child* David Buckingham,2013-04-26 Children today are growing up in an increasingly commercialised world But should we see them as victims of manipulative marketing or as competent participants in consumer culture The Material Child provides a comprehensive critical overview of debates about children s changing engagement with the commercial market It moves from broad overviews of the theory and history of children s consumption to insightful case studies of key areas such as obesity sexualisation children s broadcasting and education In the process it challenges much of the received wisdom about the effects of advertising and marketing arguing for a more balanced account that locates children s consumption within a broader analysis of social relationships for example within the family and the peer group While refuting the popular view of children as incompetent and vulnerable consumers that is adopted by many campaigners it also rejects the easy celebration of consumption as an expression of children s power and autonomy Written by one of the leading international scholars in the field The Material Child will be of interest to students researchers and policy makers as well as parents teachers and others
