Why We Lie David Livingstone Smith, 2007-08-07
Deceit lying and falsehoods lie at the very heart of our cultural heritage Even the founding myth of the Judeo Christian tradition the story of Adam and Eve revolves around a lie We have been talking writing and singing about deception ever since Eve told God The serpent deceived me and I ate Our seemingly insatiable appetite for stories of deception spans the extremes of culture from King Lear to Little Red Riding Hood retaining a grip on our imaginations despite endless repetition These tales of deception are so enthralling because they speak to something fundamental in the human condition The ever present possibility of deceit

is a crucial dimension of all human relationships even the most central our relationships with our very own selves Now for the first time philosopher and evolutionary psychologist David Livingstone Smith elucidates the essential role that deception and self deception have played in human and animal evolution and shows that the very structure of our minds has been shaped from our earliest beginnings by the need to deceive Smith shows us that by examining the stories we tell the falsehoods we weave and the unconscious signals we send out we can learn much about ourselves and how our minds work Readers of Richard Dawkins and Steven Pinker will find much to intrigue them in this fascinating book which declares that our extraordinary ability to deceive others and even our own selves lies at the heart of our humanity Fixing Failed States Ashraf Ghani,Clare Lockhart,2009 Social science *Lying and Deception in Everyday Life* Michael Lewis,Carolyn Saarni,1993-02-05 I speak the truth not so much as I would but as much as I dare Montaigne All cruel people describe themselves as paragons of frankness Tennessee Williams Truth and deception like good and evil have long been viewed as diametrically opposed and unreconcilable Yet few people can honestly claim they never lie In fact deception is practiced habitually in day to day life from the polite compliment that doesn't accurately relay one's true feelings to self deception about one's own motivations What fuels the need for people to intricately construct lies and illusions about their own lives If deceptions are unconscious does it mean that we are not responsible for their consequences Why does self deception or the need for illusion make us feel uncomfortable Taking into account the sheer ubiquity and ordinariness of deception this interdisciplinary work moves away from the cut and dried notion of duplicity as evil and illuminates the ways in which deception can also be understood as a adaptive response to the demands of living with others The book articulates the boundaries between unethical and adaptive deception demonstrating how some lies serve socially approved goals while others provoke distrust and condemnation Throughout the volume focuses on the range of emotions from feelings of shame fear or envy to those of concern and compassion that motivate our desire to deceive ourselves and others Providing an interdisciplinary exploration of the widespread phenomenon of lying and deception this volume promotes a more fully integrated understanding of how people function in their everyday lives Case illustrations humor and wit concrete examples and even a mock television sitcom script bring the ideas to life for clinical practitioners behavioral scientists and philosophers and for students in these realms Payoff Dan Ariely,2016-11-17 Every day we work hard to motivate ourselves We spend much of our time trying to motivate the people working for us with us and in business with us In our personal lives we try to motivate our friends partners and children From the economic point of view motivation is based on a very simple trade off we need and want things and we work to get them We're more likely to do something if we get money for it and the more money we get the more motivated we are But what if our understanding of motivation and money is all wrong In Payoff Dan Ariely investigates the true nature of motivation and our partial blindness to the way it works He digs to the root of money motivation and explains how understanding it can help us to successfully approach different choices in our

lives Along the way Ariely explores complex questions like Why are we willing to part with money on some occasions and not others Should we motivate children to do chores by giving them money Is there any correlation between performance efficiency and pay What are the taboos surrounding money and should they be challenged We often mistakenly think that our motivations are simple and one dimensional But motivations are about the essence of what pushes us forward what make us human Payoff explores the complex motivations that drive us giving insight into what we really want in life and what we can do to get and give more of it more often
