The Hungry Soul Eating And The Perfecting Of Our Nature:

The Hungry Soul Leon Kass, 1999-05 Originally published New York Free Press Toronto Maxwell Macmillan Canada New York Maxwell Macmillan International c1994 With new foreword The Ethics of Human Cloning Leon Kass, James Q. Wilson, 1998 Today biological science is rising on a wall of worry No other science has advanced more dramatically during the past several decades or yielded so many palpable improvements in human welfare Yet none except nuclear physics has aroused greater apprehensions among the general public and leaders in such diverse fields as religion the humanities and government In this engaging book Leon R Kass the noted teacher scientist humanist and chairman of the President's Council on Bioethics and James Q Wilson the preeminent political scientist to whom four United States presidents have turned for advice on crime drug abuse education and other crises in American life explore the ethics of human cloning reproductive technology and the teleology of human sexuality Although in their lively dialogue both authors share a fundamental distrust of the notion of human cloning they base their resistance on different views of the role of sexual reproduction and the role of the family Professor Kass contends that in vitro fertilization and other assisted reproduction technologies that place the origin of human life in human hands have eroded the respect for the mystery of sexuality and human renewal Professor Wilson in contrast asserts that whether a human life is created naturally or artificially is immaterial as long as the child is raised by loving parents in a two parent family and is not harmed by the means of its conception This accessible volume promises to inform the public policy debate over the permissible conduct of genetic research and the permissible uses of its discoveries **Wing to Wing, Oar to Oar** Amy A. Kass, Leon Kass, 2000 Despite current concerns for family values and the dissolution of marriages Amy A and Leon R Kass see very little attention being paid to what makes for marital success They argue there are no longer socially prescribed forms of conduct that help guide young men and women in the direction of matrimony the very concepts of wooing and courting seem archaic Yet they see major discontent with the present situation and detect among their students certain longings for friendship for wholeness for a life that is serious and deep and for associations that are trustworthy and lasting longings they do not realize could be largely satisfied by marrying well Wing to Wing Oar to Oar Courting and Marrying is an anthology of source readings offered as a response to the contemporary cultural silence surrounding love that leads to marriage It addresses important questions that emerge not from theory but from practice Why marry Is this love How can I find and win the right one to marry What about sex Why a wedding and the promises of marriage What can married life be like Using readings taken mainly from classic texts of Homer Herodotus Plato Aquinas Erasmus Shakespeare Rousseau Austen Tolstoy C S Lewis Miss Manners and many others this collection challenges our unexamined opinions expands our sympathies elevates our gaze It offers a higher kind of sex education one that prepares hearts and minds for romance leading to lasting marriage and introduces us to possibilities open to human beings in everyday life that may be undreamt of in our current philosophizing This unapologetically pro marriage anthology is intended

to help young people of marriageable age and their parents think about the meaning purpose and virtues of marriage and especially about finding the right person with whom to make a life My Life Today Ellen Gould Harmon White,2015-06

Life Liberty & the Defense of Dignity Leon Kass,2002-10-01 At the onset of Life Liberty and the Defense of Dignity Leon Kass gives us a status report on where we stand today Human nature itself lies on the operating table ready for alteration for eugenic and psychic enhancement for wholesale redesign In leading laboratories academic and industrial new creators are confidently amassing their powers and quietly honing their skills For anyone who cares about preserving our humanity the time has come for paying attention Trained as a medical doctor and biochemist Dr Kass has become one of our most provocative thinkers on bioethical issues In Life Liberty and the Defense of Dignity he has written a book that grapples with the moral meaning of the new biomedical technologies now threatening to take us back to the future envisioned by Aldous Huxley in Brave New World In a series of mediations on cloning embryo research the sale of organs and the assault on mortality itself Kass questions the wisdom of trying to break down the natural boundaries given us and to remake the human body into an instrument of our will He also attempts to chart a course by which we might avoid the dehumanization of biotechnical recreationism without rejecting modern science or rejecting its genuine contributions to human welfare Leon Kass writes profoundly about the limits of science and the limits of life about what makes us human and gives us human dignity Life Liberty and the Defense of Dignity **Toward a More Natural Science** Leon R. Kass,2008-06-30 Kass shows

how the promise and the peril of our time are inextricably linked with the promise and the peril of modern science The relation between the pursuit of knowledge and the conduct of life between science and ethics each broadly conceived has in recent years been greatly complicated by developments in the science of life This book examines the ethical questions involved in prenatal screening in vitro fertilization artificial life forms and medical care and discusses the role of human beings in nature **River of Stars** Guy Gavriel Kay,2013-04-02 In his critically acclaimed novel Under Heaven Guy Gavriel

Kay told a vivid and powerful story inspired by China s Tang Dynasty Now the international bestselling and multiple award winning author revisits that invented setting four centuries later a world inspired this time by the glittering decadent Song Dynasty *The Soul of Prayer* Peter Taylor Forsyth,1951 Here is a no nonsense theologian who goes for the jugular In Forsyth s company we are aware of both the glory and the gravity of what we are doing when we go to our knees in prayer Eugene H Peterson P T Forsyth is sometimes described as an English pre cursor to Karl Barth He was born in 1848 to a Scottish family of humble origins and later in life attended Aberdeen University where he graduated with first class honours in classical literature in 1869 In 1876 he was ordained and called to minister in Shipley Yorkshire In his early ministry in the Congregational Church Forsyth fought orthodoxy and sought for the right to rethink Christian theology and pursue liberal thought In 1878 however Forsyth experienced a conversion from in his own words being a Christian to being a believer from a lover of love to an object of grace A profound awareness of pastoral responsibility was awakened which radically altered

the the course of his ministry His conversion thrust him from the leadership of liberalism to a recovery of the theology of grace Quickly he became one of the better known figures in British Nonconformity In 1894 he received a call to Emmanuel College in Cambridge where he preached his famous sermon Holy Father in 1896 In 1901 he accepted a position as principal of Hackney Theological College London where he remained until he died in 1921 Over his lifetime Forsyth published 25 books and more than 260 articles He is often credited with recovering for his generation the reality and true dimensions of the grace of God

Here Be Dragons Olle Häggström, 2016-01-22 There is a widely held conception that progress in science and technology is our salvation and the more of it the better This however is an oversimplified and even dangerous attitude While the future will certainly offer huge changes due to such progress it is far from certain that all of these changes will be for the better The unprecedented rate of technological development that the 20th century witnessed has made our lives today vastly different from those in 1900 No slowdown is in sight and the 21st century will most likely see even more revolutionary changes than the 20th due to advances in science technology and medicine Particular areas where extraordinary and perhaps disruptive advances can be expected include biotechnology nanotechnology and machine intelligence We may also look forward various ways to enhance human cognitive and other abilities using e g pharmaceuticals genetic engineering or machine brain interfaces perhaps to the extent of changing human nature beyond what we currently think of as human and into a posthuman era The potential benefits of all these technologies are enormous but so are the risks including the possibility of human extinction This book is a passionate plea for doing our best to map the territories ahead of us and for acting with foresight so as to maximize our chances of reaping the benefits of the new technologies while avoiding the dangers

Passionate Deliberation M.F. Carr, 2012-12-06 Despite the modern recovery of virtue theory in ethics conceptions of temperance remain largely unexamined In this study I offer an examination of certain interpretive threads of temperance as a virtue beginning in classical philosophy and moving through early to medieval Christian conceptions I find contemporary notions of temperance to be sorely lacking when compared and contrasted to these historical conceptions Aristotelian and Thomistic accounts of temperance are particularly important to the normative statement of temperance I offer here To fully understand temperance one must recognize its place among the moral virtues in particular phronesis or practical judgment Though I place temperance within practical judgment this study stops short of offering a full account of virtue theory and how it may or may not relate to other theories of the moral life While contemporary views of temperance occasionally note its general relevance to the experience of emotion I elaborate upon the work of temperance as an essential part of the effort to include emotion in the moral life In present day studies of the psychology of emotion cognitive theories have reasserted the classical conception of emotion as consisting of both physiological and psychological elements of human personhood Temperance is the primary virtue in the moral agent's effort to appropriately include the entirety of the emotional experience in moral deliberation I find it relevant to a moral response to both the physiological and psychological elements of emotion
