works Increasingly people claim to be spiritual but not religious or to prefer individual religion to organized religion Scholars have for decades noted the phenomenon primarily within the middle class of individuals picking and choosing elements from among various religious traditions forming their own religion or spirituality for themselves While the topics of spirituality and individual religion are regularly treated as self evident by the media and even some scholars of religion Capitalizing Religion provides one of the first critical analyses of the phenomenon arguing that these recent forms of spirituality are in many cases linked to capitalist ideology and consumer practices Examining cases such as Eckhart Tolle s The Power of Now and Karen Berg s God Wears Lipstick Craig Martin ultimately argues that so called individual religion is a religion of the status quo or more critically an opiate of the bourgeoisie Capitalizing Religion Ideology and Opiate of the Bourgeoisie is a landmark publication in critical religious studies What is Christian Democracy? Carlo Invernizzi Accetti,2019-10-03 Christian Democratic actors and thinkers have been at the forefront of many of the twentieth century s key political battles from the construction of the international human rights regime through the process of European integration and the creation of postwar welfare regimes to Latin American development policies during the Cold War Yet their core ideas remain largely unknown especially in the English speaking world Combining conceptual and historical approaches Carlo Invernizzi Accetti traces the development of this ideology in the thought and writings of some of its key intellectual and political exponents from the mid nineteenth century to the present day In so doing he sheds light on a number of important contemporary issues from the question of the appropriate place of religion in presumptively secular liberal democratic regimes to the normative resources available for building a political response to the recent rise of far right populism **Religious Statecraft** Mohammad Ayatollahi Tabaar,2018-05-08 Since the 1979 revolution scholars and policy makers alike have tended to see Iranian political actors as religiously driven dedicated to overturning the international order in line with a theologically prescribed outlook This provocative book argues that such views have the link between religious ideology and political order in Iran backwards Religious Statecraft examines the politics of Islam rather than political Islam to achieve a new understanding of Iranian politics and its ideological contradictions Mohammad Ayatollahi Tabaar traces half a century of shifting Islamist doctrines against the backdrop of Iran s factional and international politics demonstrating that religious narratives in Iran can change rapidly frequently and dramatically in accordance with elites threat perceptions He argues that the Islamists gambit to capture the state depended on attaining a monopoly over the use of religious narratives Tabaar explains how competing political actors strategically develop and deploy Shi a inspired ideologies to gain credibility constrain political rivals and raise mass support He also challenges readers to rethink conventional wisdom regarding the revolution Ayatollah Khomeini the U S embassy hostage crisis the Iran Iraq War the Green Movement nuclear politics and U S Iran relations Based on a micro level analysis of postrevolutionary Iranian media and recently declassified documents as well as theological journals and political memoirs Religious Statecraft constructs a new picture of Iranian politics in which power

drives Islamist ideology

The Invention of World Religions Tomoko Masuzawa, 2005-05-15 The idea of world religions expresses a vague commitment to multiculturalism Not merely a descriptive concept world religions is actually a particular ethos a pluralist ideology a logic of classification and a form of knowledge that has shaped the study of religion and infiltrated ordinary language In this ambitious study Tomoko Masuzawa examines the emergence of world religions in modern European thought Devoting particular attention to the relation between the comparative study of language and the nascent science of religion she demonstrates how new classifications of language and race caused Buddhism and Islam to gain special significance as these religions came to be seen in opposing terms Aryan on one hand and Semitic on the other Masuzawa also explores the complex relation of world religions to Protestant theology from the hierarchical ordering of religions typical of the Christian supremacists of the nineteenth century to the aspirations of early twentieth century theologian Ernst Troeltsch who embraced the pluralist logic of world religions and by so doing sought to reclaim the universalist destiny of European modernity

Manufacturing Religion Russell T. McCutcheon, 1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade's life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute the field's object of study in a form that is ahistoric apolitical fetishized and sacrosanct As such he charges it has helped to create departments jobs and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match Surveying the textbooks available for introductory courses in comparative religion the author finds that they uniformly adopt the sui generis line and all that comes with it As a result he argues they are not just uncritical which helps keep them popular among the audiences for which they are intended but badly disserve but actively inhibit the emergence of critical perspectives and capacities And on the geo political scale he contends the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism

The Myth of Religious Violence William T Cavanaugh, 2009-09-03 The idea that religion has a dangerous tendency to promote violence is part of the conventional wisdom of Western societies and it underlies many of our institutions and policies from limits on the public role of religion to efforts to promote liberal democracy in the Middle East William T Cavanaugh challenges this conventional wisdom by examining how the twin categories of religion and the secular are constructed A growing body of scholarly work explores how the category religion has been constructed in the modern West and in colonial contexts according to specific configurations of political power Cavanaugh draws on this scholarship to examine how timeless and transcultural categories of religion and the secular are used in arguments that religion causes

violence He argues three points 1 There is no transhistorical and transcultural essence of religion What counts as religious or secular in any given context is a function of political configurations of power 2 Such a transhistorical and transcultural concept of religion as non rational and prone to violence is one of the foundational legitimating myths of Western society 3 This myth can be and is used to legitimate neo colonial violence against non Western others particularly the Muslim world

The Cambridge Companion to Religious Studies Robert A. Orsi, 2012 Informative and provocative this book introduces readers to debates in the contemporary study of religion and suggests future research possibilities
