The International Economy:

Constructing the International Economy Rawi Abdelal, Mark Blyth, Craig Parsons, 2011-03-15 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere Constructing the International Economy sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents interests Constructing the International Economy portrays the diversity of models and approaches that exist among constructivists writing on the international political economy The authors outline and relate several different arguments for why scholars might attend to social construction inviting the widest possible array of scholars to engage with such approaches They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm

The International Economy Since 1945 Sidney Pollard, 2002-09-11 Describing the most important global developments in economics during the last half century this comprehensive history covers all geographical regions and considers the effects of the major countries on each other

Failure to Adjust Edward Alden, 2016-10-20 Americans know that something has gone wrong in this country's effort to prosper in the face of growing global economic competition The vast benefits promised by the supporters of globalization and by their own government have never materialized for most Americans This book is the story of what went wrong and how to correct the course It is a compelling history of the last four decades of US economic and trade policies that have left Americans unable to adapt to or compete in the current global marketplace **Failure to Adjust** argues that despite the deep partisan divisions over how best to respond to America's competitive challenges there is achievable common ground on such issues as fostering innovation overhauling tax rules to encourage investment in the United States boosting graduation rates investing in infrastructure and streamlining regulations The federal government needs to become more like US state governments in embracing economic competitiveness as a central function of government The book presents an especially timely analysis of the trade policies of the Obama administration and discusses how America can reassert itself as the leader in setting rules for international economic competition that would spread the benefits of global trade and investment more broadly

Credit Reporting Systems and the International Economy Margaret J. Miller, 2003 The first comprehensive review of credit reporting systems worldwide including their institutional forms and evidence of their impact on financial markets Credit reporting is a critical part of the financial system in most developed economies but is often weak or absent in developing countries It addresses a

fundamental problem of credit markets asymmetric information between borrowers and lenders that can lead to adverse selection and moral hazard The heart of a credit report is the record it provides of an individual's or a firm's payment history which enables lenders to evaluate credit risk more accurately and lower loan processing time and costs Credit reports also strengthen borrower discipline since nonpayment with one institution results in sanctions with others This book provides the first comprehensive review of credit reporting systems worldwide and documents the rapid growth in the industry It offers empirical and theoretical evidence of the impact of credit reporting on financial markets using examples from both developed and developing economies Credit reporting it shows significantly contributes to predicting default risk of potential borrowers which promotes increased lending activity The book also covers the role of public policy in the development of credit reporting initiatives including the role of public credit registries managed by central banks and the role of legal regulatory and institutional factors in supporting credit reporting

Reintegrating India with the World Economy T. N.

Srinivasan, Suresh D Tendulkar, 2003-05-01 After nearly five decades of insulation from world markets state controls and slow growth India embarked in 1991 on a process of liberalization of controls and progressive integration with the global economy in an effort to put its economy on a path of rapid and sustained growth Despite major changes in the government since then the thrust on reforms has been maintained According to the World Bank only 10 out of 145 countries had more rapid growth than India at over 6 percent per year in the 1990s and two had the same as India's In this study T N Srinivasan and Suresh D Tendulkar analyze the economics and politics of India's recent and growing integration with the world economy They argue that this process has to be nurtured and accelerated if India is to eradicate its poverty and take its rightful place in the global economic system The study covers the historical roots and the political economy of India's late integration domestic and external constraints on integration external capital inflows including foreign direct investment and India's emerging comparative advantage in the information technology industry and services particularly computer software The final chapter offers policy recommendations including proposals that India could make at the ongoing Doha Round of multilateral trade negotiations
