the close contact with blood urine and faeces and the involvement with the rites of birth illness and death This book first published in 1991 explores the alternative ways different societies have developed to reconcile these contradictions Using contemporary historical and cross cultural case material the contributors trace the historical development of the role and investigate the expected qualities of nurses within different cultural settings such as India Uganda and Japan They look closely at the nurse as a social construct and demonstrate how the stereotypes relate to a particular society's notions of gender Designed primarily for anthropologists and sociologists interested in health illness and systems of health care this book challenges some of the myths of traditional nursing studies and provides an original perspective on doctor nurse patient relationships

Diversity Issues in Substance Abuse Treatment and Research Sana Loue, 2007-06-02 Although the term diversity is widely used there is often no agreed-upon meaning as to its meaning or how attention to diversity should be operationalized within the context of programming or research This text provides a foundation for the examination of such issues with suggestions for the integration of various approaches into substance use treatment programs and research The impetus for this work derived from multiple interactions over a period of several years with colleagues students research participants and community-based providers who noted the frequent inattention paid to such concerns in the context of treatment and research often despite an acknowledgment of a group's particular historical legacy in the United States and the impact of that history on the initiation and prolongation of substance use within a specific community or the barriers to treatment that may have resulted Chapter 1 defines what is meant by diversity through an examination of related terms such as culture ethnicity race sex gender and sexual orientation Clearly this discussion does not and cannot reflect all possible permutations of human existence that reflect diversity For instance although the text does make mention of considerations related to religious differences and cognitive capacity neither is highlighted as a separate topic Additionally the emphasis on specific groups is not meant to imply that other groups such as Euro-Americans or heterosexual men do not have concerns that may differ from those of other communities and that deserve consideration in the development and implementation of programs and research endeavors However trite it may seem one text cannot do it all

Philosophical Perspectives on Gender in Sport and Physical Activity Paul Davis, Charlene Weaving, 2009-09-10

There are a broad variety of sex and gender resonances in sport from the clash of traditional ideas of femininity and athleticism represented by female athletes to the culture of homophobia in mainstream male sport. Despite the many sociological and cultural volumes addressing these subjects, this collection is the first to focus on the philosophical writings that they have inspired. The editors have selected twelve of the most thought provoking philosophical articles on these subjects from the past thirty years to create a valuable and much needed resource. Written by established experts from all over the world, the essays in this collection cover four major themes: sport and the construction of the female, objectification and the sexualization of sport, homophobia, sex boundaries, obstruction, naturalization and opposition. The book gathers a broad range of philosophical viewpoints on gender in sport into one unique source, subjecting the philosophical origins and characteristics of some of the most controversial topics in sport to rigorous scrutiny. With a balance of male and female contributors from both sides of the Atlantic and a comprehensive introduction and postscript to contextualize the source material, *Philosophical Perspectives on Gender in Sport and Physical Activity* is essential reading for all students of the philosophy of sport, sport and gender, and feminist philosophy. *Policing the National Body* Jael Silliman, Jael Miriam Silliman, Anannya Bhattacharjee, 2002. This anthology explores the ways in which women of color are monitored, criminalized and regulated. *Women in Culture* Bonnie Kime Scott, Susan E. Cayleff, Anne Donadey, Irene Lara, 2016-08-01. The thoroughly revised *Women in Culture 2e* explores the intersections of gender, race, sexuality, gender identity and spirituality from the perspectives of diverse global locations. Its strong humanities content, including illustrations and creative writing, uniquely embraces the creative aspects of the field. Each of the ten thematic chapters leads to creative readings, introducing a more intersectional thinking amongst students from a humanistic angle than is typical of textbooks in the field. This textbook is queer inclusive and allows students to engage with postcolonial, decolonial thinking, spirituality and reproductive environmental justice. A detailed timeline of feminist history, criticism and theory is provided, and the glossary encourages the development of critical vocabulary. A variety of illustrations supplement the written materials, and an accompanying website offers instructors pedagogical resources. **On the Pill** Elizabeth Siegel Watkins, 2001-09-14. In 1968 a popular writer ranked the pill's importance with the discovery of fire and the developments of tool making, hunting, agriculture, urbanism, scientific medicine and nuclear energy. Twenty five years later the leading British weekly, the *Economist*, listed the pill as one of the seven wonders of the modern world. The image of the oral contraceptive as revolutionary persists in popular culture, yet the nature of the changes it supposedly brought about has not been fully investigated. After more than thirty five years on the market, the role of the pill is due for a thorough examination. In this fresh look at the pill's cultural and medical history, Elizabeth Siegel Watkins re-examines the scientific and ideological forces that led to its development, the part women played in debates over its application, and the role of the media, medical profession and pharmaceutical industry in deciding issues of its safety and meaning. Her study helps us not only to understand the

contraceptive revolution as such but also to appreciate the misinterpretations that surround it **The Political Geographies of Pregnancy** Laura R. Woliver, 2010-10-01 A searing study of how modern reproductive politics shapes women's bodily agency Pregnancy indisputably takes place within a woman's body But as reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver The Political Geographies of Pregnancy is a vigorous analysis of the ways modern reproductive politics are shaped by long standing debates on abortion and adoption surrogacy arrangements new reproductive technologies medical surveillance and the mapping of the human genome Across a politically charged backdrop of reproductive issues Woliver exposes strategies that claim to uphold the best interests of children families and women but in reality complicate women's struggles to have control over their own bodies Utilizing feminist standpoint theory and promoting a feminist ethic of care Woliver looks at abortion politics modern adoption laws that cater to male headed families regulations that allow the state to monitor pregnant women but not always provide care for them and the power structures behind the seemingly benign world of egg selling and surrogate parenting She also considers the potentially staggering political implications of mapping the human genome and the exclusion of women's perspectives in discussions about legislation and advancements in reproductive technologies **The Journey Beyond Breast Cancer** Virginia M. Soffa, 1994-05 Currently one out of every nine American women will be diagnosed with breast cancer at some time in her life Virginia Soffa who was diagnosed with breast cancer at age 38 takes a critical look at both conventional and alternative treatments and outlines a strategy to help women take an active role in preventing and treating the disease *Anthropology U.C.L.A.* , 1992
