Making It Up Together Leslie A. Tilley, 2020-04-03 Most studies of musical improvisation focus on individual musicians But that is not the whole story From jazz to flamenco Shona mbira to Javanese gamelan improvised practices thrive on group creativity relying on the close interaction of multiple simultaneously improvising performers In *Making It Up Together* Leslie A. Tilley explores the practice of collective musical improvisation cross culturally making a case for placing collectivity at the center of improvisation discourse and advocating ethnographically informed music analysis as a powerful tool for investigating improvisational processes Through two contrasting Balinese case studies of the reyong gong chime s melodic norot practice and the interlocking drumming tradition kendang arja Tilley proposes and tests analytical frameworks for examining collectively improvised performance At the micro level Tilley s analyses offer insight into the note by note decisions of improvising performers at the macro level they illuminate larger musical discursive structural and

cultural factors shaping those decisions This multi tiered inquiry reveals that unpacking how performers play and imagine as a collective is crucial to understanding improvisation and demonstrates how music analysis can elucidate these complex musical and interactional relationships Highlighting connections with diverse genres from various music cultures Tilley's examinations of collective improvisation also suggest rich potential for cross genre exploration The surrounding discussions point to larger theories of communication and interaction creativity and cognition that will be of interest to a range of readers from ethnomusicologists and music theorists to cognitive psychologists jazz studies scholars and improvising performers Setting new parameters for the study of improvisation *Making It Up Together* opens up fresh possibilities for understanding the creative process in music and beyond

Studies in Historical Improvisation

Massimiliano Guido, 2017-01-06 In recent years scholars and musicians have become increasingly interested in the revival of musical improvisation as it was known in the Renaissance and Baroque periods This historically informed practice is now supplanting the late Romantic view of improvised music as a rhapsodic endeavour a musical blossoming out of the capricious genius of the player that dominated throughout the twentieth century In the Renaissance and Baroque eras composing in the mind *alla mente* had an important didactic function For several categories of musicians the teaching of counterpoint happened almost entirely through practice on their own instruments This volume offers the first systematic exploration of the close relationship among improvisation music theory and practical musicianship from late Renaissance into the Baroque era It is not a historical survey per se but rather aims to re establish the importance of such a combination as a pedagogical tool for a better understanding of the musical idioms of these periods The authors are concerned with the transferral of historical practices to the modern classroom discussing new ways of revitalising the study and appreciation of early music The relevance and utility of such an improvisation based approach also changes our understanding of the balance between theoretical and practical sources in the primary literature as well as the concept of music theory itself Alongside a word centred theoretical tradition in which rules are described in verbiage and enriched by musical examples we are rediscovering the importance of a music centred tradition especially in Spain and Italy where the music stands alone and the learner must distil the rules by learning and playing the music Throughout its various sections the volume explores the path of improvisation from theory to practice and back again
